**Subject:** CPRA request / NBC News

Dear Clerk:

Under the California Public Records Act, I am hereby requesting any and all documentation, correspondence, specs, legal memos, drafts, images, videos, audio, maps, and any other records or materials associated with Knightscope.

Specifically, I am interested in emails between any and all city officials and/or police officer and representatives of the company Knightscope.

See: <https://www.nbcnews.com/tech/tech-news/robocop-park-fight-how-expectations-about-robots-are-clashing-reality-n1059671>

This is to include any relevant police reports, after-action reports, memos, briefings, talking points, video and/or audio recordings, CAD logs, and datasets released internally and/or from any @hpcg.gov account to any @knightscope.com account, or anyone else operating on Knightscope's behalf.

Please consider the timeline range from January 1, 2017 (or whenever the earliest such record begins) until this search request is fulfilled.

As a journalist acting in the public interest I would request a fee waiver. Further, in the interests of saving taxpayer funds, I would request that all data and documents be communicated electronically.

If specific portions of any documents are exempt from disclosure, please provide the non-exempt portions and please provide a statutory reason as to why those records are exempt.

Please contact me by phone (646-872-5369) if you have further questions or by email at your convenience.

Thanks,

-C

**Subject:** Call?

Hello Peckler,  
I hope all is well.

I represent Knightscope. We provide autonomous robots and are helping companies to prevent crime and theft, improve safety, and support policy enforcement throughout their properties. Do you have availability for a call tomorrow at 9:30 AM or Friday at 1:30 PM?

Thank you,

Jason M. Gonzalez

Director Client Development

Knightscope, Inc.

(323) 496-9367 mobile

[www.knightscope.com](http://www.knightscope.com)

Knightscope's Autonomous Data Machine (Robot) is patrolling, viewing & recording 360-degree HD cameras, listening, detecting, speaking to and alerting for threats of violence, crime, theft and vandalism. Autonomous Data Machines provide a greater physical deterrent, enhancing parking management and parking violation monitoring; managing the physical threat landscape with a deep learning AI platform that is fast, intuitive and powerful.

Good Evening Everyone!

I hope it was a great week for you all. I wanted to see if we can schedule a call for next week to discuss the proposed patrol routes as well as the robot branding.

We would like to button all of this up so that we can set the deployment schedule and have all the needed items finalized.

Please let me know what works best for everyone's schedule and I will set it up.

Thank you all and have a great weekend,

Chris

Thanks for jumping in Jason. "Extremely busy" – pretty much sums it up for me. Some have even come to believe I have a stunt double or an identical twin!!!

Back to business; Tom, Jason has provided most of the information I think you were seeking. I'll just add a few more details.

- 1). City Hall does have an elevator that will accommodate moving RoboCop to the 2<sup>nd</sup> floor.
- 2). 4 pm for RoboCop to be in place inside Council Chambers is actually a bit early. I think 5 pm-ish would be a better time.
- 3). The presentation of RoboCop will be at the top of Council Agenda, so it will take place shortly after 6 pm.
- 4). On the Council Agenda; after Presentations there is Public Comment, then there is Closed Session, which generally comes up at around 7 pm. During Closed Session, we would like to move RoboCop to the hallway just outside of Council Chambers, to a pre-designated location, where it will remain until your team is ready to return it to Salt Lake Park.
- 5). In addition to Daniel, I am also available as your point of contact. My cell # is (323) 864-9280 and like me, it never sleeps.

Thank you for your help and attention and let me know if you need any other details.

**Subject:** Council Meeting

Hello Chief,

Thank you again for meeting with me yesterday.

I spoke with our team yesterday afternoon about moving the robot for next Tuesday's Council Meeting and as we discussed it can be done. However, I was informed by our team that Konica Minolta will charge a fee for this which we would need to pass along to the City. It's on a time and material basis so could range from \$500 to \$1000 for each pick-up and delivery, depending on how long it takes. The other option we discussed was to have the City move it. We may be able to do that, but need to look at having a waiver for any damage. As soon as we have confirmation on the second option, we'll circle back.

Let me know if you have any questions for now.

Thanks!

**Subject:** Council Meeting

Hello Chief,

Thank you again for meeting with me yesterday.

I spoke with our team yesterday afternoon about moving the robot for next Tuesday's Council Meeting and as we discussed it can be done. However, I was informed by our team that Konica Minolta will charge a fee for this which we would need to pass along to the City. It's on a time and material basis so could range from \$500 to \$1000 for each pick-up and delivery, depending on how long it takes. The other option we discussed was to have the City move it. We may be able to do that, but need to look at having a waiver for any damage. As soon as we have confirmation on the second option, we'll circle back.

Let me know if you have any questions for now.

Thanks!

Hello Chris;

Can you tell me the present status of RoboCop?

Is it back on patrol?

Have the graphics issues noted by Mayor Macias been corrected?

Have the announcements issues been addressed?

Thanks –

**Subject:** HPRoboCop Updated

Good Evening Everyone!

I am happy to announce that the new charging upgrade has been installed on HpRoboCop! Our engineer has checked everything over and it is looking good. It is currently charging to get back to full power and then HPRoboCop will be back to full patrol.

Thank You All for working with us through this new change and we are happy to bring the newest Knightscope function to your robot.

Please let me know if you have any questions and I am happy to assist any way I can.

Thanks!

Chris

Hello Chris;

Hope you had a good weekend.

Just seeking a status update on HP RoboCop. Last we communicated the wrap had not been repaired and there was no announcements being broadcast by the robot. There may have been another small issue or two, but I don't have them readily in mind at the moment.

I also want to virtually introduce you to Senior Officer Manny Soberanis. He is new to my Administrative staff and will be my lead on our RoboCop program. Moving forward, please communicate directly with him on anything related to RoboCop. He will be sure to brief me on important matters. I have copied him on this email to loop him in and to provide you his email address.

Thanks –

## RoboCop Reporting For Duty In Huntington Park

**HUNTINGTON PARK (CBSLA)** — The Huntington Park City Council Tuesday got its first look at the newest member of the city's police force — a robot. HP RoboCop will be used to keep an electronic eye on public areas when human police officers are not around. The robot is designed for outside use and comes equipped with 360-degree high-definition cameras that can feed live video to the department and also record footage for subsequent viewing. Police say the blue-and-white robot can provide the department with data to help lower crime, help patrol areas that officers might not have time to patrol and offer help with all kinds of investigations. The robot has been helping patrol a park in the city for several weeks since its preview at a 5K run last month. HP RoboCop even has its own Twitter account: @HPRoboCop

April 04, 2019 12:23 PM Eastern Daylight Time

MOUNTAIN VIEW, Calif.--  
(BUSINESS WIRE)--  
[Knightscope, Inc.](#), a developer of advanced physical security technologies focused on enhancing U.S. security operations, announced today that facial recognition software utilizing deep learning to detect, analyze and compare faces is now available, in beta format, on its K1 security robot platform to

help enhance Workplace Violence Prevention (WVP) programs for companies across the United States.

“According to OSHA, 58% of senior managers have been threatened by an employee, and about 2 million employees report some type of workplace violence each year in the US,” said Stacy Stephens, former police officer, EVP and chief client officer at Knightscope. “Knightscope is providing its clients with a way to ingest images of known threats and persons of interest to provide an additional layer of protection for the places we visit and work.”

Knightscope has been testing its beta release of facial recognition with existing client, Pechanga Resort Casino in Temecula, Calif. “Knightscope’s enhanced capabilities provide Pechanga with added levels of security that were not possible before,” said Robert Krauss, Vice President of Public Safety at Pechanga Resort Casino. “We began working with Knightscope and their security robots over a year ago. Pechanga knew the technology would be another tool for the resort-casino’s 350-person public safety team in maintaining wellbeing for our guests and team members.”

For more information on Knightscope or to request a demo to see how security robots will help enhance your guarding needs, go to [www.knightscope.com](http://www.knightscope.com).

Good afternoon Mr. Reider,

My name is Juan Preciado and I'm with the city of Huntington Park, Department Public Works. We are having a 4<sup>th</sup> of July event tomorrow, and we need to store the robot "Robocop" in the warehouse because of this event in the park. We need to make this happen as soon as possible, please contact Parks Supervisor, Alvaro Encarnacion, on his cell to make necessary arrangements, at: (323) 447-2858. Thank you in advance for your prompt assistance.

Sincerely,

Juan A. Preciado | Public Works Supervisor  
City of Huntington Park | Public Works Department

Cynthia,

It was great talking with you and I appreciate you calling me.

I have notified our team to park HPRoboCop at his pad tomorrow at 7am and remain parked by us until 7am on July 5<sup>th</sup>. We are happy to assist and I hope the City 4<sup>th</sup> of July Festival is huge success.

Stay Safe and a Happy 4<sup>th</sup> to you all.

Thanks,

Chris

Hi Christopher,

Sounds great to me. Thank you for moving on this.

I appreciate your response to my other email. I know you all are committed to make sure we provide the best of service to the community through HpRoboCop, but as I mention the response is key. The updates you mentioned for the charging pad, sound great. A council colleague did tell me yesterday that she had seen HpRoboCop still in the same spot as Sunday and not moving. Any visit that can be done soon would be appreciated to look into this issue.

As mentioned, regardless how the council votes on the pool project on our August 6 meeting, it is imperative that we meet to discuss the route to make sure we address those connectivity issues. I have looped in this email our parks director, Cynthia Norzagaray for her knowledge. This was not brought up early on and I want to make sure we get all the details on this matter.

Thank you,

Karina Macias

Hi Jason —

Have answers to some of your questions:

- \* Robot name — going with “HP Robo Cop”
- \* Wrap — police uniform theme with HPPD’s badge
- \* Deployment contact — Daniel is cc’d here
- \* Knightscope software — Ive also included our Chief. He can assist in identifying that contact.

Ill sit down with Daniel to go over some of the proposed routes and mapping, but in the meantime, it is ok to begin coordinating with him.

Let me know if you have any other questions.

Thank you.

Good morning Rick,

Thank you again for helping us get started on deploying the robot. As we discussed on our call yesterday, below are a few items we'll need your team's help with.

Map – Outline the patrol routes and 2 charge pad locations with 110V power.

Wrap – We need either an Illustrator (.ai), .eps or a vector based .pdf of the logo you'd like to use with the city seal.

Robot Name – This is optional, but we can include the robots official name on the wrap if the city wants to.

Deployment Contact – Please provide the contact info for Daniel Hernandez.

Knightscope Software – Please provide the contact info for the person at the PD that will be using our software and handling alerts from the robot.

Please let me know if you have any questions.

Thanks again,

Sgt. Settles,

Good morning. Can you assist Jason with the PD graphic?

Daniel Hernandez | Director of Public Works | City of Huntington Park Public Works | 6900 Bissell Street | Huntington Park, CA 90255 City Hall | 6550 Miles Avenue | Huntington Park, CA 90255 Office (323) 584-6320 | Cell (323) 395-1480

Hello Daniel,

I'm checking back with you regarding the patrol map. When do you think you'll have it? You'll be able to make updates in the next few weeks if needed. Also, for the graphics on the robot we will need either an Illustrator (.ai), .eps or a vector based .pdf of the HPPD badge. Can you please provide that for us?

Thanks,

Hi Jason —

Have answers to some of your questions:

- \* Robot name — going with “HP Robo Cop”
- \* Wrap — police uniform theme with HPPD’s badge
- \* Deployment contact — Daniel is cc’d here
- \* Knightscope software — Ive also included our Chief. He can assist in identifying that contact.

Ill sit down with Daniel to go over some of the proposed routes and mapping, but in the meantime, it is ok to begin coordinating with him.

Let me know if you have any other questions.

Thank you.

Good morning Rick,

Thank you again for helping us get started on deploying the robot. As we discussed on our call yesterday, below are a few items we’ll need your team’s help with.

Map – Outline the patrol routes and 2 charge pad locations with 110V power.  
Wrap – We need either an Illustrator (.ai), .eps or a vector based .pdf of the logo you’d like to use with the city seal.  
Robot Name – This is optional, but we can include the robots official name on the wrap if the city wants to.  
Deployment Contact – Please provide the contact info for Daniel Hernandez.  
Knightscope Software – Please provide the contact info for the person at the PD that will be using our software and handling alerts from the robot.

Please let me know if you have any questions.

Thanks again,

Jason M Gonzalez

Hi Rick,

I hope all is well. The team is preparing to deploy the robot next week and had a few more questions regarding power.

Can you please confirm where the power is located on the property? A picture of a map showing the location or clear description of where should suffice.

What amperage is the circuit and is it a dedicated outlet? Has it been tested?

Lastly, will there be a secure lock box on the outlet to prevent people from unplugging the charging system?

Thanks,  
Tom

**Subject:** KSOC Training

Cosme,

Good morning Sir and I hope you are doing well. We are in the final stages of certifying your deployment and I wanted to get with you to set up the KSOC training for you and your officers.

This will take 1hr to complete and it is a webinar that I conduct with screen share so that you and your staff can see the KSOC and what it can do. I can do multiple sessions to accommodate everyone's schedules, I am happy to do that.

If you have users that you want me to provide KSOC access to you can shoot me their first name, last name and email address. I will set this up so that they can receive access.

Also, on the intercom button for the robot do you have a specific number that you want us to program? Let me know and I will set this up.

Thanks Chief,

Chris

**Subject:** RE: Wrap Vendor Contact

Hello Chris –

There's no need for the Vendor to check in or out with anyone at the police department to perform the wrap work on RoboCop. The technician(s) can simply show up and perform the work.

I will inform our Dispatch Center and Watch Commander of the work that will be performed so they are aware in case someone calls in the activity to the police department.

Thanks –

Good Afternoon Gentlemen,

We have our wrap vendor coming Friday and I wanted to see if there was a particular contact we should give to them if they need anything.

Chief – I know we have been working with Sgt. Suttles recently but, if there is someone else that we should use please let me know and I will notify the vendor.

Thank you both,

Chris

Good afternoon Mr. Reider,

My name is Juan Preciado and I'm with the city of Huntington Park, Department Public Works. We are having a 4<sup>th</sup> of July event tomorrow, and we need to store the robot "Robocop" in the warehouse because of this event in the park. We need to make this happen as soon as possible, please contact Parks Supervisor, Alvaro Encarnacion, on his cell to make necessary arrangements, at: (323) 447-2858. Thank you in advance for your prompt assistance.

Sincerely,

Juan A. Preciado | Public Works Supervisor

**Subject:** You're Invited

Hello Peckler,

You're invited to come see our security robots in action. We've been expanding our footprint in the Southern California area and now have several clients with robots busy at work. I'll be scheduling on-site appointments for next week, on Tuesday and Wednesday. Please let me know if you're interested and we can schedule a time to meet our robot in person.

Thank you,

Jason M. Gonzalez
